TUB
PLUG

cover plate connected to linkage

cover plate not connected to linkage

If cover plate is connected to linkage remove full linkage assembly with cover plate

Step 1: Remove cover plate by unscrewing screws holding it in place.

Step 2: Install Tub Plug with screws from cover plate

Step 3: Plunge tub. Downward pressure created from suction will push down clog(In the event the clog comes up to drain opening use needle nose pliers to remove)

TUB
PLUG

Step 4: Remove Tub Plug reinstall cover plate
